FORT WILLIAM,
CIVIL AUDITOR'S OFFICE,
THE 23D NOVEMBER, 1843.

NOTICE.

PARTIES availing themselves of leave of absence granted under the Rules in force, are required, when submitting separate Pay Bills for audit, as is occasionally done, to forward all their Certificates, stating distinctly the dates of quitting and resuming their respective Offices, or if their Pay and Allowances are incorporated in the General Abstracts of the Office, the Officer in charge will be careful to do so. At present, for want of a rule of practice on this head, the Civil Auditor is too frequently left to gather the facts incidentally, and much delay and tedious references are thereby entailed before the Bills can be properly checked.

W. H. BELLI,
Offy. Civil Auditor.

IMMIGRATION.

His Excellency the Governor directs the following Draft of an Ordinance for reducing the bounty on male Immigrants who may leave India after the end of the present year, to be published for general information.

Observations thereon may be addressed to the Secretary to the Council until Saturday, the 11th November next.

Colonial Secretary's Office, 27th October 1843.

GEO. F. DICK,
Colonial Secretary.

DRAFT OF ORDINANCE.

WHEREAS the Immigration of Indian laborers has now reached a stage at which it appears expedient provisionally to modify, in some respects, the amount of the premium granted for the passage of the said laborers from India to this colony, and thereby to prevent the excess of such Immigration and the prejudicial consequences that would ensue therefrom, until, in concurrence with the Government of India, measures shall have been adopted for establishing a constant and regular system of Immigration, commensurate with the future wants of the colony and the interests of the Immigrants,

His Excellency the Governor in Council has ordered and does hereby order :

Art. 1.—The premium of Seven Pounds Sterling allowed by Ordinance No. 3, of the present year for the passage of each Indian laborer legally conveyed to this colony is and shall be reduced to Four Pounds Sterling for each Indian laborer, (women excepted) who after the 31st December of the present year, shall have quitted the territory of India for Mauritius, and with the exception moreover of all adult male Indian laborers who, after the above mentioned date, may come to this colony in virtue of a special authority from the Governor thereof.

NOTICE.

The following Notice touching the exhibition of a Light from the New Light House at Madras, is published for general information.

By order of the Superintendent of Marine,

C. B. GREENLAW,

Secretary.

Fort William, the 28th Novr. 1843.

"NOTICE."

MARINE BOARD OFFICE,

Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the 1st day of January 1844, a Light will be exhibited on the New Light House erected at Madras immediately to the Northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the Light heretofore and now exhibited on the Old Light House within the Walls of Fort St. George, will be discontinued. The New Light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the Deck of a Ship at the distance of 20 miles. The Light is of the "Flashing Description," and the duration of the Flashes to that of the Eclipses or Dark periods is in the ratio of 2 to 3,—but as the nature of the Motion is Reciprocating instead of Rotatory, the above ratio merely expresses the average proportion of the Light and Dark intervals which are themselves variable according to the position of the Spectator. The rapidity of movement is so adjusted, that the duration of the Flashes will vary from 0" to 48", and that of the Eclipses from 0" to 72," the sums of the duration of Light and Darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the New Light House bears S. 23° W., and is distant 13 miles; but no Ship or Vessel when hauling in from the Northward for the Madras Roadstead should bring the Light to bear to the Southward of S. 26° W., or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of Vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the Light,—true Soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 9 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. b. W. to W. $\frac{1}{4}$ N.

The New Light House

At Madras is in Latitude 13° 5' 10" North,

And in.....Longitude 80° 20' East of Greenwich.

Published by order of the Marine Board at Fort St. George,

Acting Secretary.

NOTICE.

The following Notice touching the exhibition of a Light from the New Light House at Madras is published for general information.

By order of the Superintendent of Marine,

C. B. GREENLAW,

Secretary.

Fort William, the 28th Novr. 1843.

"NOTICE."

MARINE BOARD OFFICE,

Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the 1st day of January 1844, a Light will be exhibited on the New Light House erected at Madras immediately to the Northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the Light heretofore and now exhibited on the Old Light House within the Walls of Fort St. George, will be discontinued. The New Light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the Deck of a Ship at the distance of 20 miles. The Light is of the "Flashing Description," and the duration of the Flashes to that of the Eclipses or Dark periods is in the ratio of 2 to 3,—but as the nature of the Motion is Reciprocating instead of Rotatory, the above ratio merely expresses the average proportion of the Light and Dark intervals which are themselves variable according to the position of the Spectator. The rapidity of movement is so adjusted, that the duration of the Flashes will vary from 0" to 48", and that of the Eclipses from 0" to 72," the sums of the duration of Light and Darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the New Light House bears S. 23° W., and is distant 13 miles; but no Ship or Vessel when hauling in from the Northward for the Madras Roadstead should bring the Light to bear to the Southward of S. 28° W., or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of Vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the Light,—true Soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 9 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. b. W. to W. $\frac{1}{2}$ N.

The New Light House

At Madras is in Latitude 13° 5' 10" North,

And in.....Longitude 80° 20' East of Greenwich.

18th.—It is hereby further notified, that under the 6th Article of the Convention between Great Britain and France dated the 7th March 1815, quoted below, the Agents in India of His Majesty the King of the French, or Persons duly appointed by them, are entitled to demand that out of the quantities of Behar and Benares Opium declared as above for Sale, at the five Sales in the months of January, February, April, May and June, there shall be delivered to them at the average of the particular Sale or Sales, to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisition for the whole of the Opium required by them during the year within 30 days after the publication of this Advertisement specifying the particular Sale or Sales from which the quantity of Opium is intended to be taken. If the Agents of the French Government shall not make the requisition for Opium within the time above-mentioned, the entire quantity of about 18,352 Chests of Behar and Benares as above estimated, will be brought to Sale in the usual manner, and if they shall make application for a quantity of Opium to be delivered to them out of the quantity advertised for Sale, at each or any of the five Sales above-mentioned, but shall not pay for it within the prescribed period of payment, the Deputy Governor of Bengal reserves to himself the right of disposing of the Opium, which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the Sale next ensuing the date of payment, or by selling it at a Sale to be held expressly for the purpose.

Article of the Convention.—“With regard to the Trade in Opium it is agreed between the High Contracting Parties that at each of the periodical Sales of that Article there shall be reserved for the French Government and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of Chests so applied for, provided that such supply shall not exceed three hundred Chests in each year, and the price for the same shall be determined by the average rate at which Opium shall have been sold at every such periodical Sale, it being understood that, if the quantity of Opium applied for at any one time shall not be taken on account of the French Government, by the Agents of His Most Christian Majesty, within the usual period of delivery, the quantity so applied for, shall nevertheless be considered as so much in reduction of the three hundred Chests herein before mentioned, the requisitions for Opium, as aforesaid, are to be addressed to the Governor General at Calcutta, within thirty days after notice of the intended Sales shall have been published in the Government Gazette.”

By Order of the Board of Customs, Salt and Opium,

H. TORRENS, Secretary

NOTICE.

The following Notice touching the exhibition of a Light from the New Light House at Madras, is published for general information.

By order of the Superintendent of Marine,

C. B. GREENLAW,

Secretary.

"NOTICE."

MARINE BOARD OFFICE,

Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the 1st day of January 1844, a Light will be exhibited on the New Light House erected at Madras immediately to the Northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the Light heretofore and now exhibited on the Old Light House within the Walls of Fort St. George, will be discontinued. The New Light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the Deck of a Ship at the distance of 20 miles. The Light is of the "Flashing Description," and the duration of the Flashes to that of the Eclipses or Dark periods is in the ratio of 2 to 3,—but as the nature of the Motion is Reciprocating instead of Rotatory, the above ratio merely expresses the average proportion of the Light and Dark intervals which are themselves variable according to the position of the Spectator. The rapidity of movement is so adjusted, that the duration of the Flashes will vary from 0" to 48", and that of the Eclipses from 0" to 72," the sums of the duration of Light and Darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the New Light House bears S. 23° W., and is distant 13 miles; but no Ship or Vessel when hauling in from the Northward for the Madras Roadstead should bring the Light to bear to the Southward of S. 28° W. or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of Vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the Light,—true Soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 1 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. b. W. to W. $\frac{1}{4}$ N.

The New Light House

At Madras is in Latitude 13° 5' 10" North,

And in.....Longitude 80° 20' East of Greenwich.

LEGISLATIVE,
THE 2D DECEMBER, 1843.

The following Draft of a proposed Act was read in Council for the first time on the 2d December 1843.

Act No. — of 1843.

An Act for legalizing the infliction of Corporal Punishment in cases of Petty Larceny generally, and when committed by offenders of tender age.

I. Whereas it is expedient until adequate improvements in Prison Discipline can be effected to substitute corporal punishment for imprisonment in the case of certain offences:

It is hereby enacted, in modification of C. S. 2, Regulation II. of 1834, that it shall be competent to a Magistrate, on conviction in cases of thefts of property not exceeding in value the sum of Fifty Rupees, to sentence the person convicted to corporal punishment not exceeding twenty stripes of a rattan.

II. And whereas it is also expedient, that offenders of tender age should be punished rather in the way of School discipline than of ordinary criminal justice:

It is hereby enacted, that it shall be competent to a Magistrate, and he is hereby required, on conviction in cases of theft of property not exceeding in value the sum of Fifty Rupees, if the person convicted shall appear to him by inspection or other evidence to be of such tender years as to require

punishment rather in the way of School discipline than of ordinary criminal justice, to sentence such person to corporal punishment with a light ratan, not exceeding ten stripes.

III. And it is hereby further provided and enacted, that no female shall be subject to corporal punishment, and that in cases of infliction of corporal punishment, no other punishment shall be superadded, and that the punishment shall be inflicted on all occasions in the presence of the Magistrate.

NOTICE.

The following Notice touching the exhibition of
a Light from the New Light House at Madras,
is published for general information.

By order of the Superintendent of Marine,
C. B. GREENLAW,
Secretary.

Fort William, the 28th Novr. 1843.

"NOTICE."

MARINE BOARD OFFICE,
Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the
1st day of January 1844, a Light will be
exhibited on the New Light House erected at
Madras immediately to the Northward of the
Walls of Fort St. George; and that on and after
the said 1st day of January 1844, the Light here-
tofore and now exhibited on the Old Light House
within the Walls of Fort St. George, will be dis-
continued. The New Light (to be exhibited) will
be elevated 128 feet above the mean level of the
Sea,—and may be seen from the Deck of a Ship
at the distance of 20 miles. The Light is of the
"Flashing Description," and the duration of the
Flashes to that of the Eclipses or Dark periods is
in the ratio of 2 to 3,—but as the nature of the
Motion is Reciprocating instead of Rotatory, the
above ratio merely expresses the average propor-
tion of the Light and Dark intervals which are
themselves variable according to the position of
the Spectator. The rapidity of movement is so
adjusted, that the duration of the Flashes will
vary from 0" to 48", and that of the Eclipses from
0" to 72," the sums of the duration of Light and
Darkness bearing however, in every position, the
constant ratio of 2 to 3. From the South Eastern
extremity of the Pulicat Shoal the New Light
House bears S. 23° W., and is distant 13 miles;
but no Ship or Vessel when hauling in from the
Northward for the Madras Roadstead should bring
the Light to bear to the Southward of S. 28° W.,
or S. S. W. ½ W.,—unless her position is well as-
certained. Commanders of Vessels are hereby
warned of the serious risk they incur by incau-
tiously approaching the dangerous vicinity of the
Pulicat Shoal, as hazy weather or other causes
may obscure the Light,—true Soundings therefore
and a vigilant look out are imperatively called for.
The limits of the Madras Roadstead (in 8 or 9
fathoms) are comprised within the following bear-
ings, viz. from the Northward the Light House
will bear S. 56° W., and from the Southward
N. 81° W. or from S. W. by W. to W. ½ N.

The New Light House
At Madras is in Latitude 13° 5' 10" North,
And in.....Longitude 80° 20' East of Green-
wich.

Published by order of the Marine Board at
Fort St. George,

J. R. BOYSON,
Acting Secretary.

that Excavations, surrounded with fences,
and having lights at night, are in progress in the
undermentioned Thoroughfares in the Town of

nade Row, West, Syphon Tunnel to be repaired.

ROBT. J. ROSE,

dered in payment for Salt shall not be taken at

the forenoon, will be put up to Sale at the Exchange
Rooms at Calcutta, and sold by Public Auction, for
Exportation by Sea, the undermentioned quantity of
Opium, the Provision of 1842-43, subject to the following
Conditions; viz.

Produce of Behar Agency, Chests 4,000
Ditto of Benares ditto, „ 2,000

Total Chests 6,000

CONDITIONS OF SALE.

1st.—The Opium will be sold for Exportation by Sea
only, and no Certificate will be granted except to cover
such Export.

2d.—The Opium to be offered for Sale at an Upset Price
of Rupees 400 per Chest, and to be all sold to the highest
bidder above that price.

3d.—If at the above Sale the entire quantity of 6,000
Chests shall not be sold, it shall subsequently be competent
for the Board of Customs, Salt and Opium, to dispose of
the lots which remain on hand at future Sales.

4th.—Each Lot to contain Five Chests.

5th.—A deposit in a Promissory Note for 1,000 Rupees
per Lot or 200 Rupees per Chest, shall be made by the
Purchaser in the Sale Room, and before the Lot is Regis-
tered in the Sale Book, and all such Promissory Notes shall
be redeemed on the part of Purchasers at this Office by Sub-
Treasurer's Receipts, or by substitution of other Public Secu-
rities of the Bengal Government, on or before 4 o'Clock of
the afternoon of Friday, the 12th January 1844, or, on the
other hand, failing such redemption by the time aforesaid,
then the Lot or Lots for which no Sub-Treasurer's Receipts,
or Deposit of other Public Securities as aforesaid, shall have
been delivered in, shall be re-sold at such time or times,
and under such Conditions of Re-sale as the Board of Cus-
toms, Salt and Opium, shall see fit, and all losses and ex-
pences whatsoever attending such Re-sale, shall be borne
and paid by the Defaulters, whilst any profit accruing from
such Re-sale shall be forfeited to Government.

6th.—The Promissory Notes taken on the day of Sale,
under the last mentioned Condition, if remaining unre-
deemed on the said 12th January 1844, will be placed in
the hands of the Attorney to the Hon'ble Company for
realization in such manner as to him shall seem fit.

7th.—No Tender of Money, Sub-Treasurer's Receipts or Public Securities, on account of Opium, upon which the prescribed deposit may not have been made before 4 o'clock of the 12th January, will be afterwards accepted.

8th.—The Opium now advertised for Sale shall be paid for within one Calendar month from the day of Sale, that is to say, no Treasury Receipts will be accepted in payment after 4 p. m. of Thursday, the 8th February 1844, and in case any Lots of such Opium shall not be so paid for and adjusted, then the Cash Deposit of 1,000 Rupees per Lot or 200 Rupees per Chest, or any Public Securities that may have been deposited on account of such Lots or Chests, shall be forfeited, and the Opium be disposed of on account of Government at such time and in such manner as the Board of Customs, Salt and Opium, shall think fit.

9th.—Purchasers taking out Certificates or Orders for the delivery of Opium, after making full payment as above prescribed, shall have the option of naming the number of Lots of their purchase, which they may desire to be included in each Certificate or Order, and it is to be clearly understood, that the Certificates or Orders so taken out shall be considered final, and not afterwards changeable for other Certificates or Orders authorizing the delivery of single Lots, or of a different number of Lots or Chests, whether more or less than the number of Lots or Chests originally required to be included in each Certificate or Order.

10th.—No Sub-Treasurer's Receipts, or Deposit of Public Securities, under the fifth of the present Conditions, will be received in this Office, except from the party recorded as the purchaser in the Sale Book, or his authorized Agent. The Receipt for such Deposit will be granted only in the name of such Purchaser and the Public Securities deposited, will be returned when the clearance has been made by the said Purchaser or his order.

11th.—The Officer Superintending the Sale on the part of the Board of Customs, Salt and Opium, is empowered to reject at his discretion the bid of any individual, unless such individual shall, on demand, tender at the time, a Deposit either in Bank of Bengal Notes, Sub-Treasurer's Receipts, or other Government Securities, equal to One Thousand Rupees per Lot, (or Two Hundred Rupees per Chest,) on each Lot so bid for.

12th.—The Purchaser of any Lot shall have the option of naming and purchasing in immediate succession any number of Lots of the same Agency Opium to the extent of Fifty Lots, and for the Lots so purchased, the Purchaser shall deposit 1,000 Rupees per Lot, and pay the same price per Chest as that for which he purchased his first Lot, provided always that there remain a sufficient number of Lots of that Opium to complete the said Fifty, but not otherwise.

13th.—In the event of any dispute or difference touching or concerning any matter or question arising out of the Sale of the Opium included in this Notification, or adjustment of the account thereof, the same shall and may be tried and decided in the Supreme Court of Judicature at Fort William in Bengal, and all and every Plea and Pleas to the jurisdiction of the said Supreme Court shall be waived.

14th.—The following Papers, together with samples of the Opium for Sale, will be exhibited for inspection on the day of Sale, or may be seen previously to that date, by application at the Office of the Secretary to the Board of Customs, Salt and Opium.

No. 1.—Certificate of the Opium now advertised for Sale.

No. 2.—Report of the Examination of such Opium.

15th.—The Public are hereby informed, that in providing the investment of the Behar and Benares Opium for the year 1842-43, the same precautions have been taken as those which have been observed during past years, to have the Drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the Drug when packed at Behar and Benares, and a Statement of the average weight of Six Chests from each dispatch at Calcutta, may be seen on application at the Office of the Secretary to the Board of Customs, Salt and Opium.

16th.—Four Chests of Behar and Benares Opium, which have been reserved from the provision of the two preceding years, will be also shewn to the Purchasers on the day of Sale, to enable them to judge of the state of preservation in which the Drug has kept.

17th.—The Public are hereby informed, that in addition to the quantity abovementioned, the following quantities more or less of Behar and Benares Opium will be brought to Sale this year on or about the date specified below.

	Behar about Chests.	Benares about Chests.	Total about Chests.
On or about February 12th,	1,500	700	2,200
On or about April 15th, ...	8,000	1,800	4,800
On or about May 20th,	1,500	700	2,200
On or about June 24th	2,544	1,106	3,650
	8,544	3,806	12,350

18th.—It is hereby further notified, that under the 6th Article of the Convention between Great Britain and France dated the 7th March 1815, quoted below, the Agents in India of His Majesty the King of the French, or Persons duly appointed by them, are entitled to demand that out of the quantities of Behar and Benares Opium declared as above for Sale, at the five Sales in the months of January, February, April, May and June, there shall be delivered to them at the average of the particular Sale or Sales, to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisition for the whole of the Opium required by them during the year within 30 days after the publication of this Advertisement specifying the particular Sale or Sales from which the quantity of Opium is intended to be taken. If the Agents of the French Government shall not make the requisition for Opium within the time abovementioned, the entire quantity of about 18,352 Chests of Behar and Benares as above estimated, will be brought to Sale in the usual manner, and if they shall make application for a quantity of Opium to be delivered to them out of the quantity advertised for Sale, at each or any of the five Sales abovementioned, but shall not pay for it within the prescribed period of payment, the Deputy Governor of Bengal reserves to himself the right of disposing of the Opium, which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the Sale next ensuing the date of payment, or by selling it at a Sale to be held expressly for the purpose.

ARTICLE 6th.—“With regard to the Trade in Opium it is agreed between the High Contracting Parties that at each of the periodical Sales of that Article there shall be reserved for the French Government and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of Chests so applied for, provided that such supply shall not exceed three hundred Chests in each year, and the price for the same shall be determined by the average rate at which Opium shall have been sold at every such periodical Sale, it being understood that, if the quantity of Opium applied for at any one time shall not be taken on account of the French Government, by the Agents of His Most Christian Majesty, within the usual period of delivery, the quantity so applied for, shall nevertheless be considered as so much in reduction of the three hundred Chests herein before mentioned, the requisitions for Opium, as aforesaid, are to be addressed to the Governor General at Calcutta, within thirty days after notice of the intended Sales shall have been published in the Government Gazette.”

By Order of the Board of Customs, Salt and Opium,

H. TORRENS, Secretary.

No. 1461.

NOTICE.

The following Notice touching the exhibition of a Light from the New Light House at Madras, is published for general information.

By order of the Superintendent of Marine,

C. B. GREENLAW,

Secretary.

Fort William, the 28th Novr, 1843.

“NOTICE.”

MARINE BOARD OFFICE,

Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the 1st day of January 1844, a Light will be exhibited on the New Light House erected at Madras immediately to the Northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the Light heretofore and now exhibited on the Old Light House within the Walls of Fort St. George, will be discontinued. The New Light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the Deck of a Ship at the distance of 20 miles. The Light is of the “Flashing Description,” and the duration of the Flashes to that of the Eclipses or Dark periods is in the ratio of 2 to 3,—but as the nature of the Motion is Reciprocating instead of Rotatory, the above ratio merely expresses the average proportion of the Light and Dark intervals which are themselves variable according to the position of the Spectator. The rapidity of movement is so adjusted, that the duration of the Flashes will vary from 0" to 48", and that of the Eclipses from 0" to 72," the sums of the duration of Light and Darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the New Light House bears S. 23° W., and is distant 13 miles; but no Ship or Vessel when hauling in from the Northward for the Madras Roadstead should bring the Light to bear to the Southward of S. 28° W., or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of Vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the Light,—true Soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 9 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. by W. to W. $\frac{1}{4}$ N.

The New Light House

	Behar about Chests.	Benares about Chests.	Total about Chests.
On or about February 12th,	1,500	700	2,200

18th.—It is hereby further notified, that under the 6th Article of the Convention between Great Britain and France dated the 7th March 1815, quoted below, the Agents in India of His Majesty the King of the French, or Persons duly appointed by them, are entitled to demand that out of the quantities of Behar and Benares Opium declared as above for Sale, at the five Sales in the months of January, February, April, May and June, there shall be delivered to them at the average of the particular Sale or Sales, to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisition for the whole of the Opium required by them during the year within 30 days after the publication of this Advertisement specifying the particular Sale or Sales from which the quantity of Opium is intended to be taken. If the Agents of the French Government shall not make the requisition for Opium within the time abovementioned, the entire quantity of about 18,350 Chests of Behar and Benares as above estimated, will be brought to Sale in the usual manner, and if they shall make application for a quantity of Opium to be delivered to them out of the quantity advertised for Sale, at each or any of the five Sales abovementioned, but shall not pay for it within the prescribed period of payment, the Deputy Governor of Bengal reserves to himself the right of disposing of the Opium, which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the Sale next ensuing the date of payment, or by selling it at a Sale to be held expressly for the purpose.

Article 6th.—“With regard to the Trade in Opium it is agreed between the High Contracting Parties that at each of the periodical Sales of that Article there shall be reserved for the French Government and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of Chests so applied for, provided that such supply shall not exceed three hundred Chests in each year, and the price for the same shall be determined by the average rate at which Opium shall have been sold at every such periodical Sale, it being understood that, if the quantity of Opium applied for at any one time shall not be taken on account of the French Government, by the Agents of His Most Christian Majesty, within the usual period of delivery, the quantity so applied for, shall nevertheless be considered as so much in reduction of the three hundred Chests herein before mentioned, the requisitions for Opium, as aforesaid, are to be addressed to the Governor General at Calcutta, within thirty days after notice of the intended Sales shall have been published in the Government Gazette.”

By Order of the Board of Customs, Salt and Opium,

In the Chair.

1st. It was proposed by W. P. Grant, Esq., and seconded by Rustomjee Cowarjee, Esq., and carried unanimously.—Resolved, that the Memorials now read, addressed respectively to the Right Hon'ble the Lords Commissioners of Her Majesty's Treasury, the Right Hon'ble the President of the Board of Control, and the Hon'ble the Court of Directors of the East India Company be adopted, and that the number of requisitionists by whom the present Meeting is called, amounting to nearly fourteen hundred, is so large as to preclude the possibility of obtaining their signatures to these Memorials far less those of the many others who would be desirous of signing them in time for their despatch by the next Mail, and that therefore the Sheriff be requested to sign them on behalf of this Meeting.

TO THE HONORABLE THE COURT OF DIRECTORS OF THE EAST INDIA COMPANY.

THE MEMORIAL OF THE INHABITANTS OF THE TOWN OF CALCUTTA AND OF ITS NEIGHBOURHOOD, IN TOWN HALL DULY CONVENED AND ASSEMBLED ON THE ELEVENTH DAY OF DECEMBER, ONE THOUSAND EIGHT HUNDRED AND FORTY-THREE.

Sheweth,—That your Memorialists have learnt that the Directors of the Peninsular and Oriental Steam Navigation Company have submitted to Her Majesty's Government, and the Directors of the Hon'ble East India Company, a proposal to undertake the monthly transmission of the Mails between Bombay and Suez.

That for the execution of this proposed service, combined with their other arrangements in the Indian seas, the Directors have stated that the Peninsular and Oriental Company are provided with two Steam ships the *Hindustan* and *Bentinck*; that they have at their disposal a new, large, and powerful Steamer, capable of being completed for sea in three months; and that, though these three vessels are amply sufficient for the performance, under ordinary circumstances, of the whole services contemplated, the Company propose to provide a fourth vessel as a reserve to meet contingencies.

That, had it been announced merely that the expediency of contracting with the Peninsular and Oriental Company for the transmission of the Mails between Bombay and Suez, with a view to their acceleration and without interfering with the direct communication by means of Steam Vessels between Calcutta and Suez was under the consideration of Her Majesty's Government and the Directors of the Hon'ble East India Company, your Memorialists would have thought it unnecessary to address your Hon'ble Court on the matter; but as the only means by which this acceleration of the Bombay Mails is proposed to be brought about, are avowedly to be supplied by diverting Steam Vessels devoted to maintaining direct communication monthly between Calcutta and Suez, in which your Memorialists are deeply interested, they feel it necessary to protest most strongly against the injustice attempted to be done to them, and to press upon your Hon'ble Court the public importance of the interests thus threatened, which interests embrace nearly half the correspondence between Great Britain and the East, and about three-fourths of their commercial relations.

That the proposed plan for the acceleration of the Indian Mails is confined to their transit to and from Bombay, and that it is not attempted to be shown that greater expedition will be gained for the Mails to and from Ceylon, Madras and Calcutta, by carrying them via Bombay than can be achieved by the direct line between Suez and Calcutta; and your Memorialists confidently submit that if the Mail is delivered at Suez thirteen days after its despatch from England as volunteered, under a penalty, by the Peninsular and Oriental Company, it will be brought on to its several destinations more rapidly by observing such direct line than if it be carried in the first instance to

Bombay, and this, whether it be forwarded from that Presidency by Steamers, or across the country.

That in urging this upon the attention of your Hon'ble Court, your Memorialists would be understood as meaning by "the Mail" a full and complete delivery, and not a partial dispatch, which as a permanent arrangement they regard as most objectionable; and your Memorialists would respectfully submit to your Hon'ble Court that the question of acceleration of the Mails is not fairly considered unless it embrace this completeness of delivery.

That by continuing the *Hindustan* and *Bentinck* Steamers on the direct line between Calcutta and Suez, with such other boat or boats as may be deemed necessary to preserve the monthly communication uninterrupted, the entire Mail to and from this Presidency can be carried from port to port in 25 days, as has been proved by the three voyages of the *Hindustan*, which vessel has performed the entire distance in 20 days and 5 hours under steam.

That this would make the whole time between despatch and delivery 38 days, and your Memorialists strongly urge upon your Hon'ble Court that this would allow seven days between the arrival of one Mail and the dispatch of another, for answering letters, &c., and thus render practicable four perfect interchanges of correspondence in the year between Europe and this side of India, which they confidently submit cannot be accomplished if the Mails for Ceylon, Madras and Calcutta are forwarded to their respective destinations via Bombay.

That the Peninsular and Oriental Company's contract time (as proposed) to Bombay is 28 days, and your Memorialists say the Europe Mail has never been fully delivered at Calcutta in 10 days after its arrival at Bombay, and that it cannot be delivered in such time unless under more extensive inland improvements than can be carried out for a lengthened period.

That the Mails could not be brought on by a Steamer from Bombay and Calcutta in ten days with two intermediate ports of detention, and that therefore the entire Mails for Ceylon, Madras and Calcutta cannot be delivered so expeditiously via Bombay, either by land or sea, as by the direct route at present occupied by the *Hindustan* and *Bentinck*.

That in proof of the accuracy of your Memorialists' statement as to the great time required for the transit of the Mail overland via Bombay, they may mention that during the last eleven months the average time taken by the Express from Bombay to Calcutta has been upwards of 8 days and 14 hours, and by the first portion of the general Mail upwards of 10 days and 6 hours, and this independent of the time elapsing between the arrival of the Steamer at Bombay and the several dispatches from the Post Office, while the time from the arrival of the Express to that of the last portion of the Mail has ranged between 5 and 8 days.

That as a further proof of their assertion your Memorialists state, that the only Mail which has yet been brought to Calcutta by the direct route was the Falmouth portion of the September Mail which was delivered in Calcutta by the *Hindustan* 18 days after she left Aden, while the Marseilles portion of that Mail which was carried to Bombay arrived in Calcutta in six several parcels, the last of which was not delivered until 16 days after the arrival of the Steamer at Bombay, although the *Hindustan* had relieved the drawback of nearly 7,000 covers.

That, independently of the above, the correspondence of your Memorialists passing between Bombay and Calcutta is not infrequently during the rains so damaged as to be utterly illegible, and occasionally in a state to render delivery altogether impossible.

That large sums of money had been subscribed by the public of Calcutta, Madras and Ceylon for the purpose of carrying out direct communication, and arrangements made for this purpose by a Company in London who proposed to undertake the whole of the direct line on both sides of the Isthmus of Suez, and by a Company in Calcutta who proposed to limit their exertions to perfecting that part of the line which fell upon the Indian Seas, when the Peninsular and Oriental Company obtained from her Majesty's Government the exclusive privilege of conveying the Mails between Alexandria and Great Britain, and subsequently a Charter granted them peculiar advantages for Navigating the Indian Seas.

That, thereafter, upon the expressed intention of the Directors of the last named Company to complete the direct communication between Calcutta and Great Britain by way of Madras and Ceylon, before engaging on any of the other lines of Steam Communication comprehended in their Charter, the London and Calcutta Companies both relinquished their undertakings, and a large number of the

shareholders in the former Company transferred their money to the Peninsular and Oriental Company.

That the Directors of the Peninsular and Oriental Company soon afterwards sent out the *Hindustan* steam ship to ply between Calcutta and Suez, intimating that the *Bentinck* Steamer was in a state of forwardness, and that they would do all in their power towards the speedy completion of the line as originally intended.

That the *Hindustan* and *Bentinck* are the only vessels which the Peninsular and Oriental Company have as yet put upon this line.

That these two vessels would be incapable under any circumstances of fulfilling the present engagement of the Peninsular and Oriental Company respecting this line, and that three vessels in the Indian Seas are the least number by which under ordinary circumstances that direct Communication by means of Steam vessels, at all times of the year, between Calcutta and Great Britain, can be accomplished, to the speedy completion of which your Memorialists have devoted all their exertions.

That the public importance of a direct communication by means of steam vessels between Calcutta and Great Britain, as well as between Great Britain and Bombay, has been repeatedly acknowledged by your Hon'ble Court, by Parliamentary Committees, and by the Lords of the Treasury, when the general subject of establishing Steam Communication between England and India by way of the Red Sea has been under consideration.

That a Select Committee of the House of Commons on the 15th day of July 1837 reported to that Hon'ble House, that "Inasmuch as, in the opinion of the witnesses who have appeared before your Committee, a direct communication by Steam, from the Red Sea to Ceylon, Madras and Bengal, would be practicable at all seasons of the year, by the employment of vessels of adequate tonnage and power, and as under judicious arrangements, such extended establishment would appear to offer a prospect of an adequate return for the increased outlay by the conveyance of passengers, and of some valuable articles of merchandise, which cannot be expected from the limited communication with Bombay alone; your Committee feel bound to recommend a continued and zealous attention to the subject on the part of His Majesty's Government and the East India Company."

That in March 1841, the Right Hon'ble the Lords of Her Majesty's Treasury recorded their judgment to the effect that the object of establishing Steam Communication between England and India by way of the Red Sea was so important as to be worthy of a public grant, but that no plan would be deserving of adoption, which did not include direct communication to the three Presidencies of India, and the Right Hon'ble the President of the Board of Commissioners for the Affairs of India did thereupon declare his concurrence, and also that any other course would fail to fulfil the just expectations of the people of both England and of India.

That your Honorable Court have testified your concurrence in these opinions having liberally granted to the Peninsular and Oriental Company, on their commencing to open this direct route, and when they had placed but one vessel on the line, a yearly sum of £20,000 for five years.

That while your Memorialists must view with satisfaction any prospect of acceleration, the communication between England and Bombay, they confidently trust that your Hon'ble Court will not adopt any measures tending to interrupt, or in any manner interfere with, the direct line of communication between Calcutta, Madras, Ceylon and Suez—a line that being easily practicable at all seasons (which the Bombay line is not) is pre-eminently calculated to benefit the most extensive and valuable Provinces of India—those adjoining the Bay of Bengal and the Rivers Ganges and Burhampooter, and now extending from Calcutta through Assam to the confines of China.

Signed) W. P. GRANT,

Chairman of Committee.

December 11, 1843.

6th. It was proposed by James Sutherland, Esq., and seconded by James S. Stopford, Esq., and carried unanimously.—Resolved, that the cordial thanks of this Meeting be offered to Mr. Thomas Elliot for the interest he has manifested in the objects of this Meeting, and for the able, prompt, and independent manner in which he came forward to demonstrate as regards the interests of two-thirds of India, the injury which would be inflicted by any departure from the direct line of Steam Communication between Suez and Calcutta.

The thanks of the Meeting were voted to the Sheriff for the able and impartial manner in which he had conducted the duties of the day.

NOTICE

Touching the Pilot Station for the River Hooghly during the S. W. Monsoon of the year 1843, &c.

THE experience of a second season's trial of the new Pilot Station off the South Channel having established that it can be made by Vessels from False Point with the greatest facility, and that Pilots can also be readily supplied, and the same causes existing which during last S. W. Monsoon rendered necessary the removal of the Pilot Station from off Point Palmyras to a position about fifteen miles S. W. b. W. of the Outer Floating Light in Lat. 20° 56' N. Long. 88° 03' E., and in from 17 to 22 faths. water—Notice is hereby given, that this latter Station will in future be continued during S. W. Monsoon, viz. from 15th March to the 15th September.

No difficulty can possibly be felt in passing from False Point to the New Station, if common attention be paid to the Lead and to the following Directions, prepared by Captain Lloyd, late Offg. Marine Surveyor General, after a careful Survey of the ground between the two Points.

“ False Point Light House is in Lat. 20° 19½' N. and Long. 86° 47' E., and the South Channel “ Buoy in Lat. 25° 59' N. and Long. 88° 4' E., “ and bears from the Light House N. 61° E. true,

“ or N. E. by E. ¼ E. by Compass, distant 83 miles “ and is laid 12 fms.

“ A Bank of Soundings extends from off Point “ Palmyras in a direction towards the tail of the “ Western Sea Reef, and the nature of the bottom “ (as distinguished from that of the Hooghly Deposit which is Sand and Mud with shining “ specks) is a gravelly substance composed of “ Sand Shells and small Pebbles discharged from “ the “ Kunka,” and other Rivers near Point Palmyras, the lighter material of which being carried further out, is deposited, and forms what is “ called the ‘ Pilot's Ridge,’ which in crossing to “ the N. Wd., shews a little less water than on “ either side. In coming from Seaward you Shoal “ rather suddenly from 28 to 23 fms. upon its “ Eastern Edge. It is composed of a shelly sand, “ or minute gravel of a reddish or rusty brown “ color.

“ The best guide therefore to enable a Vessel “ to direct her course from Table Point to the “ Vessel at the New Station, will be to run down “ the edge of the “ Pilot's Ridge,” which can “ readily be done by making the Light House, “ and bringing it to bear about W. S. W. or “ S. W. by W. distant by computation from 10 to “ 15 miles, then steering to the E. N. Ed., and “ having gradually increased the depth of water “ to 23 fms. upon the Eastern Edge of the Ridge, “ regulate the course to keep between it and 27 “ fms. when by attention to the lead and nature “ of the soundings, course and distance run from “ the Light House, it is almost impossible to “ miss the Pilot Vessels (if the above limits are “ kept within) either by getting too far to Windward or falling to Leeward; for the soundings “ increase so rapidly to Seaward from the proposed New Station, that 28 fms. will not be more “ than 3 or 4 miles to the Southward of it, and “ 23 fms. the same distance to the Westward “ of it.

"The soundings to Seaward of the Ridge are in general a greenish or olive coloured mud, with occasionally a few bits of broken Shells mixed with it."

Vessels approaching the Station during the day are required to shew the usual signal for a Pilot and by night to give as early and as much warning as possible by firing guns, burning blue lights and by exhibiting two lights in a vertical position, when best seen, but Commanders are strictly enjoined to avoid as much as possible making the Station during the night.

To mark the Station until a proper Light Vessel is built, of which due notice will be given, one of the Pilot Vessels will shew during the day a large St. George's Jack (white with red cross) at the Main Top Gallant Mast Head and a good Mast Head Light during the night, and will burn a Blue Light and a Maroon alternately every half hour and fire a gun at 8 p. m. at Midnight and at 4 a. m. NOTICE.

The following Notice touching the exhibition of Light from the New Light House at Madras, published for general information.

By order of the Superintendent of Marine,

C. B. GREENLAW,

Secretary.

Fort William, the 28th Novr. 1843.

'NOTICE.'

MARINE BOARD OFFICE,

Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the 1st day of January 1844, a Light will be exhibited on the New Light House erected at

Madras immediately to the Northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the Light heretofore and now exhibited on the Old Light House within the Walls of Fort St. George, will be discontinued. The New Light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the Deck of a Ship at the distance of 20 miles. The Light is of the "Flashing Description," and the duration of the Flashes to that of the Eclipses or Dark periods is in the ratio of 2 to 3,—but as the nature of the Motion is Reciprocating instead of Rotatory, the above ratio merely expresses the average proportion of the Light and Dark intervals which are themselves variable according to the position of the Spectator. The rapidity of movement is so adjusted, that the duration of the Flashes will vary from 0" to 48", and that of the Eclipses from 0" to 72," the sums of the duration of Light and Darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the New Light House bears S. 23° W., and is distant 13 miles; but no Ship or Vessel when hauling in from the Northward for the Madras Roadstead should bring the Light to bear to the Southward of S. 28° W., or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of Vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the Light,—true Soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 9 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. b. W. to W. $\frac{1}{2}$ N.

The New Light House

At Madras is in Latitude 13° 5' 10" North,

And in.....Longitude 80° 20' East of Greenwich.

	Behar about Chests.	Benares about Chests.	Total about Chests.
On or about February 12th,	1,500	700	2,200
On or about April 15th, ...	3,000	1,300	4,300
On or about May 20th,	1,500	700	2,200

18th.—It is hereby further notified, that under the 6th Article of the Convention between Great Britain and France dated the 7th March 1815, quoted below, the Agents in India of His Majesty the King of the French, or Persons duly appointed by them, are entitled to demand that out of the quantities of Behar and Benares Opium declared as above for Sale, at the five Sales in the months of January, February, April, May and June, there shall be delivered to them at the average of the particular Sale or Sales, to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisition for the whole of the Opium required by them during the year within 80 days after the publication of this Advertisement specifying the particular Sale or Sales from which the quantity of Opium is intended to be taken. If the Agents of the French Government shall not make the requisition for Opium within the time abovementioned, the entire quantity of about 12,350 Chests of Behar and Benares as above estimated, will be brought to Sale in the usual manner, and if they shall make application for a quantity of Opium to be delivered to them out of the quantity advertised for Sale, at each or any of the five Sales abovementioned, but shall not pay for it within the prescribed period of payment, the Deputy Governor of Bengal reserves to himself the right of disposing of the Opium, which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the Sale next ensuing the date of payment, or by selling it at a Sale to be held expressly for the purpose.

Article of the Convention above referred to. "ARTICLE 6th.—" With regard to the Trade in Opium it is agreed between the High Contracting Parties that at each of the periodical Sales of that Article there shall be reserved for the French Government and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of Chests so applied for, provided that such supply shall not exceed three hundred Chests in each year, and the price for the same shall be determined by the average rate at which Opium shall have been sold at every such periodical Sale, it being understood that, if the quantity of Opium applied for at any one time shall not be taken on account of the French Government, by the Agents of His Most Christian Majesty, within the usual period of delivery, the quantity so applied for, shall nevertheless be considered as so much in reduction of the three hundred Chests herein before mentioned, the requisitions for Opium, as aforesaid, are to be addressed to the Governor General at Calcutta, within thirty days after notice of the intended Sales shall have been published in the Government Gazette."

FORT WILLIAM, 22d December, 1843.

No. 284 of 1843.—The Hon'ble the President in Council has much pleasure in publishing the following paragraphs of a Letter from the Hon'ble the Court of Directors, to the Governor of Bengal, No. 19, dated 3d May 1843.

Para. 1. The announcement of the intended return to Europe of Lieutenant Colonel Everest, and his consequent vacation of the office of Surveyor General and Superintendent of the Great Trigonometrical Survey of India, affords us an opportunity, of which we readily avail ourselves, of expressing the high sense we entertain of the Scientific acquirements of that Officer, and of the ability and zeal which he has displayed in the discharge of the arduous duties entrusted to him.

2. With the measurement of an Arc of the Meridian of unprecedented magnitude, now finally completed, and with the Great Trigonometrical Survey, the most important portion of which is now in rapid progress towards completion, Lieutenant Colonel Everest has been prominently connected almost from their commencement, and

for the last 20 years, they have been under his exclusive management and superintendence.

3. The able manner in which he has conducted these important and Scientific Works, has frequently elicited our approbation, and cannot fail to cause his name to be conspicuously and intimately associated with the progress of Scientific Enquiry.

4. Having taken into our consideration the appointment of a successor to Lieutenant Colonel Everest, and entertaining a most favorable opinion of the services of Lieutenant Andrew Scott Waugh, of the Bengal Engineer Corps, and of his Scientific knowledge and general qualifications for the Stations, we have resolved to appoint him Surveyor General of India, and Superintendent of the Great Trigonometrical Survey, on a Salary of (Rs. 1500) One Thousand and Five Hundred per Mensem, with the Pay and Allowances of his Regimental Rank.

5. Lieutenant Waugh's appointment will take effect from the period of Lieutenant Colonel Everest's vacation of the office.

Lieutenant Colonel J. Everest's vacation of his appointment of Surveyor General of India, consequent on his retirement from the Service of the Hon'ble Company, having taken effect from the 16th instant, the date of the Official Notification of his departure from India per "Benluek Steamer," Captain A. S. Waugh will assume charge of the appointment of Surveyor General of India, and Superintendent of the Great Trigonometrical Survey, conformably to his nomination to the above Offices by the Hon'ble the Court of Directors.

NOTICE

*Touching the Pilot Station for the River
Hooghly during the S. W. Monsoon
of the year 1843, &c.*

THE experience of a second season's trial of the new Pilot Station off the South Channel having established that it can be made by Vessels from False Point with the greatest facility, and that Pilots can also be readily supplied, and the same causes existing which during last S. W. Monsoon rendered necessary the removal of the Pilot Station from off Point Palmyras to a position about fifteen miles S. W. b. W. of the Outer Floating Light in Lat. 20° 56' N. Long. 88° 03' E., and in from 17 to 22 faths. water—Notice is hereby given, that this latter Station will in future be continued during S. W. Monsoon, viz. from 15th March to the 15th September.

No difficulty can possibly be felt in passing from False Point to the New Station, if common attention be paid to the Lead and to the following Directions, prepared by Captain Lloyd, late Off. Marine Surveyor General, after a careful Survey of the ground between the two Points.

"False Point Light House is in Lat. 20° 19½' N. and Long. 88° 47' E., and the South Channel Buoy in Lat. 25° 59' N. and Long. 88° 4' E., and bears from the Light House N. 61° E. true, or N. E. by E. ½ E. by Compass, distant 83 miles and is laid 12 fms.

"A Bank of Soundings extends from off Point Palmyras in a direction towards the tail of the Western Sea Reef, and the nature of the bottom (as distinguished from that of the Hooghly Deposit, which is Sand and Mud with shining specks) is a gravelly substance composed of Sand Shells and small Pebbles discharged from the "Kunka," and other Rivers near Point Palmyras, the lighter material of which being carried further out, is deposited, and forms what is called the "Pilot's Ridge," which in crossing to the N. W. shows a little less water than on

"either side. In coming from Seaward you should rather suddenly from 28 to 23 fms. upon its Eastern Edge. It is composed of a shelly sand, or minute gravel of a reddish or rusty brown color.

"The best guide therefore to enable a Vessel to direct her course from Table Point to the Vessel at the New Station, will be to run down the edge of the "Pilot's Ridge," which can readily be done by making the Light House, and bringing it to bear about W. S. W. or S. W. by W. distant by computation from 10 to 15 miles, then steering to the E. N. Ed., and having gradually increased the depth of water to 23 fms. upon the Eastern Edge of the Ridge, regulate the course to keep between it and 27 fms. when by attention to the lead and nature of the soundings, course and distance run from the Light House, it is almost impossible to miss the Pilot Vessels (if the above limits are kept within) either by getting too far to Windward or falling to Leeward; for the soundings increase so rapidly to Seaward from the proposed New Station, that 28 fms. will not be more than 3 or 4 miles to the Southward of it, and 23 fms. the same distance to the Westward of it.

"The soundings to Seaward of the Ridge are in general a greenish or olive coloured mud, with occasionally a few bits of broken Shells mixed with it."

Vessels approaching the Station during the day are required to shew the usual signal for a Pilot and by night to give as early and as much warning as possible by firing guns, burning blue lights and by exhibiting two lights in a vertical position, when best seen, but Commanders are strictly enjoined to avoid as much as possible making the Station during the night.

To mark the Station until a proper Light Vessel is built, of which due notice will be given, one of the Pilot Vessels will shew during the day a large St. George's Jack (white with red cross)

at the Main Top Gallant Mast Head and a good Mast Head Light during the night, and will burn a Blue Light and a Maroon alternately every half hour and fire a gun at 8 P. M. at Midnight and at 4 A. M. Vessels approaching the Station and while there, as

W. Monsoon, whereby the Outer Floating Light was more than once compelled to leave her Station for repairs to the great inconvenience and risk of Vessels entering and quitting the River.

NOTICE.

The following Notice touching the exhibition of a Light from the New Light House at Madras, is published for general information.

By order of the Superintendent of Marine,
C. B. GREENLAW,
Secretary.

Fort William, the 28th Novr. 1843.

"NOTICE."

MARINE BOARD OFFICE,

Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the 1st day of January 1844, a Light will be exhibited on the New Light House erected at Madras immediately to the Northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the Light heretofore and now exhibited on the Old Light House within the Walls of Fort St. George, will be discontinued. The New Light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the Deck of a Ship at the distance of 20 miles. The Light is of the "Flashing Description," and the duration of the Flashes to that of the Eclipses or Dark periods is in the ratio of 2 to 3,—but as the nature of the Motion is Reciprocating instead of Rotatory, the above ratio merely expresses the average propor-

tion of the Light and Dark intervals which are themselves variable according to the position of the Spectator. The rapidity of movement is so adjusted, that the duration of the Flashes will vary from 0" to 48", and that of the Eclipses from 0" to 72," the sums of the duration of Light and Darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the New Light House bears S. 29° W., and is distant 10 miles; but no Ship or Vessel when hauling in from the Northward for the Madras Roadstead should bring the Light to bear to the Southward of S. 28° W., or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of Vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the Light,—true Soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 9 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. b. W. to W. $\frac{1}{4}$ N.

The New Light House

At Madras is in Latitude 13° 5' 10" North,

And in.....Longitude 80° 20' East of Greenwich.

NOTICE

Touching the Pilot Station for the River Hooghly during the S. W. Monsoon of the year 1843, &c.

THE experience of a second season's trial of the new Pilot Station off the South Channel having established that it can be made by Vessels from False Point with the greatest facility, and that Pilots can also be readily supplied, and the same causes existing which during last S. W. Monsoon rendered necessary the removal of the Pilot Station from off Point Palmyras to a position about fifteen miles S. W. b. W. of the Outer Floating Light in Lat. 20° 56' N. Long. 88° 03' E., and in from 17 to 22 faths. water—Notice is hereby given, that this latter Station will in future be continued during S. W. Monsoon, viz. from 15th March to the 15th September.

No difficulty can possibly be felt in passing from False Point to the New Station, if common attention be paid to the Lead and to the following Directions, prepared by Captain Lloyd, late Offg. Marine Surveyor General, after a careful Survey of the ground between the two Points.

“ False Point Light House is in Lat. 20° 19½' N. and Long. 86° 47' E., and the South Channel Buoy in Lat. 25° 59' N. and Long. 88° 4' E., and bears from the Light House N. 61° E. true, or N. E. by E. ¼ E. by Compass, distant 83 miles and is laid 12 fms.

“ A Bank of Soundings extends from off Point Palmyras in a direction towards the tail of the Western Sea Reef, and the nature of the bottom (as distinguished from that of the Hooghly Deposit which is Sand and Mud with shining specks) is a gravelly substance composed of Sand Shells and small Pebbles discharged from the “ Kunka,” and other Rivers near Point Palmyras, the lighter material of which being carried further out, is deposited, and forms what is called the ‘ Pilot's Ridge,’ which in crossing to

“ the N. Wd., shews a little less water than on either side. In coming from Seaward you Shoal rather suddenly from 28 to 23 fms. upon its Eastern Edge. It is composed of a shelly sand, or minute gravel of a reddish or rusty brown color.

“ The best guide therefore to enable a Vessel to direct her course from Table Point to the Vessel at the New Station, will be to run down the edge of the “ Pilot's Ridge,” which can readily be done by making the Light House, and bringing it to bear about W. S. W. or S. W. by W. distant by computation from 10 to 15 miles, then steering to the E. N. Ed., and having gradually increased the depth of water to 23 fms. upon the Eastern Edge of the Ridge, regulate the course to keep between it and 27 fms. when by attention to the lead and nature of the soundings, course and distance run from the Light House, it is almost impossible to miss the Pilot Vessels (if the above limits are kept within) either by getting too far to Windward or falling to Leeward; for the soundings increase so rapidly to Seaward from the proposed New Station, that 28 fms. will not be more than 3 or 4 miles to the Southward of it, and 23 fms. the same distance to the Westward of it.

“ The soundings to Seaward of the Ridge are in general a greenish or olive coloured mud, with occasionally a few bits of broken Shells mixed with it.”

Vessels approaching the Station during the day are required to shew the usual signal for a Pilot and by night to give as early and as much warning as possible by firing guns, burning blue lights and by exhibiting two lights in a vertical position, when best seen, but Commanders are strictly enjoined to avoid as much as possible making the Station during the night.

To mark the Station until a proper Light Vessel is built, of which due notice will be given,

one of the Pilot Vessels will show during the day a large St. George's Jack (white with red cross) at the Main Top Gallant Mast Head and a good Mast Head Light during the night, and will burn a Blue Light and a Maroon alternately every half hour and fire a gun at 8 p. m. at Midnight and at 4 a. m. Vessels approaching the Station and while there, as

* The Light Vessels are well as when approached when another Vessel is approaching during the night, shew a light at the Gaff end mark the way they are riding. careful in avoiding collision by night or by day—and in communicating with either of the above Vessels either at anchor or hove too, when it is necessary to cross her to pass under the Stern; several instances of serious damage having occurred during the S. W. Monsoon, whereby the Outer Floating Light was more than once compelled to leave her Station for repairs to the great inconvenience and risk of Vessels entering and quitting the River.

NOTICE.

The following Notice touching the exhibition of a Light from the New Light House at Madras, is published for general information.

By order of the Superintendent of Marine,

C. B. GREENLAW,

Secretary.

Fort William, the 28th Novr. 1843.

"NOTICE."

MARINE BOARD OFFICE,

Madras, 9th October, 1843.

NOTICE is hereby given, that on and after the 1st day of January 1844, a Light will be exhibited on the New Light House erected at Madras immediately to the Northward of the Walls of Fort St. George; and that on and after the said 1st day of January 1844, the Light heretofore and now exhibited on the Old Light House within the Walls of Fort St. George, will be discontinued. The New Light (to be exhibited) will be elevated 128 feet above the mean level of the Sea,—and may be seen from the Deck of a Ship at the distance of 20 miles. The Light is of the "Flashing Description," and the duration of the Flashes to that of the Eclipses or Dark periods is in the ratio of 2 to 3,—but as the nature of the Motion is Reciprocating instead of Rotatory, the above ratio merely expresses the average propor-

tion of the Light and Dark intervals which are themselves variable according to the position of the Spectator. The rapidity of movement is so adjusted, that the duration of the Flashes will vary from 0" to 48", and that of the Eclipses from 0" to 72," the sums of the duration of Light and Darkness bearing however, in every position, the constant ratio of 2 to 3. From the South Eastern extremity of the Pulicat Shoal the New Light House bears S. 23° W., and is distant 13 miles; but no Ship or Vessel when hauling in from the Northward for the Madras Roadstead should bring the Light to bear to the Southward of S. 28° W., or S. S. W. $\frac{1}{2}$ W.,—unless her position is well ascertained. Commanders of Vessels are hereby warned of the serious risk they incur by incautiously approaching the dangerous vicinity of the Pulicat Shoal, as hazy weather or other causes may obscure the Light,—true Soundings therefore and a vigilant look out are imperatively called for. The limits of the Madras Roadstead (in 8 or 9 fathoms) are comprised within the following bearings, viz. from the Northward the Light House will bear S. 56° W., and from the Southward N. 81° W. or from S. W. b. W. to W. $\frac{3}{4}$ N.

The New Light House

At Madras is in Latitude 13° 5' 10" North,

And in.....Longitude 80° 20' East of Greenwich.

15th.—The Public are hereby informed, that in providing the investment of the Behar and Benares Opium for the year 1842-43, the same precautions have been taken as those which have been observed during past years, to have the Drug procured and sent down in a pure state, to have

only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of Opium put into each cake. An account of the weight of the Drug when packed at Behar and Benares, and a Statement of the average weight of Six Chests from each dispatch at Calcutta, may be seen on application at the Office of the Secretary to the Board of Customs, Salt and Opium.

16th.—Four Chests of Behar and Benares Opium, which have been reserved from the provision of the two preceding years, will be also shewn to the Purchasers on the day of Sale, to enable them to judge of the state of preservation in which the Drug has kept.

17th.—The Public are hereby informed, that in addition to the quantity abovementioned, the following quantities more or less of Behar and Benares Opium will be brought to Sale this year on or about the date specified below.

	Behar about Chests.	Benares about Chests.	Total about Chests.
On or about February 12th,	1,500	700	2,200
On or about April 15th, ...	3,000	1,300	4,300
On or about May 20th,	1,500	700	2,200
On or about June 24th	2,544	1,106	3,650
	8,544	3,806	12,350

18th.—It is hereby further notified, that under the 6th Article of the Convention between Great Britain and France dated the 7th March 1815, quoted below, the Agents in India of His Majesty the King of the French, or Persons duly appointed by them, are entitled to demand that out of the quantities of Behar and Benares Opium declared as above for Sale, at the five Sales in the months of January, February, April, May and June, there shall be delivered to them at the average of the particular Sale or Sales, to which the Opium so applied for may belong, a quantity not exceeding in the aggregate 300 Chests, and the Agents of the French Government must make requisition for the whole of the Opium required by them during the year within 30 days after the publication of this Advertisement specifying the particular Sale or Sales from which the quantity of Opium is intended to be taken. If the Agents of the French Government shall not make the requisition for Opium within the time abovementioned, the entire quantity of about 18,350 Chests of Behar and Benares as above estimated, will be brought to Sale in the usual manner, and if they shall make application for a quantity of Opium to be delivered to them out of the quantity advertised for Sale, at each or any of the five Sales abovementioned, but shall not pay for it within the prescribed period of payment, the Deputy Governor of Bengal reserves to himself the right of disposing of the Opium, which the French Authorities may so fail to pay for, either by increasing the quantity reserved at the Sale next ensuing the date of payment, or by selling it at a Sale to be held expressly for the purpose.

Article of the Convention above referred to. "to the Trade in Opium it is agreed between the High Contracting Parties that at each of the periodical Sales of that Article there shall be reserved for the French Government and delivered upon requisition duly made by the Agents of His Most Christian Majesty, or by the persons duly appointed by them, the number of Chests so applied for, provided that such supply shall not exceed three hundred Chests in each year, and the price for the same shall be determined by the average rate at which Opium shall have been sold at every such periodical Sale, it being understood that, if the quantity of Opium applied for at any one time shall not be taken on account of the French Government, by the Agents of His Most Christian Majesty, within the usual period of delivery, the quantity so applied for, shall nevertheless be considered as so much in reduction of the three hundred Chests herein before mentioned, the requisitions for Opium, as aforesaid, are to be addressed to the Governor General at Calcutta, within thirty days after notice of the intended Sales shall have been published in the Government Gazette."

By Order of the Board of Customs, Salt and Opium,

H. TORRENS, Secretary.

*ing the Pilot Station for the River
ghly during the S. W. Monsoon
of the year 1843, &c.*

experience of a second season's trial of the new Pilot Station off the South Channel established that it can be made by Vessels at the Point with the greatest facility, and that it can also be readily supplied, and the same is existing which during last S. W. Monsoon required necessary the removal of the Pilot Station from off Point Palmyras to a position about 10 miles S. W. b. W. of the Outer Floating Light in Lat. 20° 56' N. Long. 88° 03' E., and in 17 to 22 faths. water—Notice is hereby given that this latter Station will in future be used during S. W. Monsoon, viz. from 15th October to the 15th September.

Difficulty can possibly be felt in passing from the Point to the New Station, if common attention be paid to the Lead and to the following directions, prepared by Captain Lloyd, late Officer Surveyor General, after a careful Survey of the ground between the two Points.

The Point Light House is in Lat. 20° 19½' and Long. 86° 47' E., and the South Channel Light in Lat. 25° 59' N. and Long. 88° 4' E., bears from the Light House N. 61° E. true, N. E. by E. ¼ E. by Compass, distant 83 miles and is laid 12 fms.

A Bank of Soundings extends from off Point Palmyras in a direction towards the tail of the Western Sea Reef, and the nature of the bottom distinguished from that of the Hooghly Delta which is Sand and Mud with shining shells is a gravelly substance composed of small Shells and small Pebbles discharged from the "Kunka," and other Rivers near Point Palmyras, the lighter material of which being carried further out, is deposited, and forms what is called the 'Pilot's Ridge,' which in crossing to the N. Wd., shews a little less water than on the other side. In coming from Seaward you Shoal suddenly from 28 to 23 fms. upon its stern Edge. It is composed of a shelly sand and minute gravel of a reddish or rusty brown color.

The best guide therefore to enable a Vessel direct her course from Table Point to the new Station, will be to run down the edge of the "Pilot's Ridge," which can easily be done by making the Light House, or bringing it to bear about W. S. W. or N. by W. distant by computation from 10 to 15 miles, then steering to the E. N. Ed., and increasing gradually the depth of water to 23 fms. upon the Eastern Edge of the Ridge, and then the course to keep between it and 27 fms. when by attention to the lead and nature

"of the soundings, course and distance run from the Light House, it is almost impossible to miss the Pilot Vessels (if the above limits are kept within) either by getting too far to Windward or falling to Leeward: for the soundings increase so rapidly to Seaward from the proposed New Station, that 28 fms. will not be more than 3 or 4 miles to the Southward of it, and 23 fms. the same distance to the Westward of it.

"The soundings to Seaward of the Ridge are in general a greenish or olive coloured mud, with occasionally a few bits of broken Shells mixed with it."

Vessels approaching the Station during the day are required to shew the usual signal for a Pilot and by night to give as early and as much warning as possible by firing guns, burning blue lights and by exhibiting two lights in a vertical position, when best seen, but Commanders are strictly enjoined to avoid as much as possible making the Station during the night.

To mark the Station until a proper Light Vessel is built, of which due notice will be given, one of the Pilot Vessels will shew during the day a large St. George's Jack (white with red cross) at the Main Top Gallant Mast Head and a good Mast Head Light during the night, and will burn a Blue Light and a Maroon alternately every half hour and fire a gun at 8 p. m. at Midnight and at 4 a. m. Vessels approaching the Station and while there, as

* The Light Vessels are well as when approached when another Vessel is approaching during the night, shew a light at the Gaff end mark the way they are riding.

and Buoy Station Vessels, are warned to be careful in avoiding collision by night or by day—and in communicating with either of the above Vessels either at anchor or hove too, when it is necessary to cross her to pass under the Stern; several instances of serious damage having occurred during the S. W. Monsoon, whereby the Outer Floating Light was more than once compelled to leave her Station for repairs to the great inconvenience and risk of Vessels entering and quitting the River.
